PROJECTS

Secure E-voting System

- Engineered a secure voting platform using iris biometric recognition and smart card authentication to prevent voter fraud and duplication.
- Developed an integrated identity verification module combining hardware and software to ensure real-time validation and seamless user interaction.
- Applied robust encryption techniques to protect voter data and maintain confidentiality throughout vote casting and transmission.
- Automated vote tallying and result generation processes to improveelection accuracy and trustworthiness.

Fresh-Bites

- Built a recipe and ordering website with multiple pages using HTML, CSS, and JavaScript that works well on all devices.
- Added features like selecting ingredient quantity and a working cart using local-Storage to save data.
- Created an admin dashboard to track user logins and see order history clearly.
- Added filter options for recipes and a dark mode toggle to make the website easier to use and more engaging for users.
- Applied CSS styles and transitions to make the website look better and improve how users interact with it.
